

solpuri

care instruction aluminium furniture

Your aluminum furniture was manufactured out of the international recognized high industrial standard for outdoor patio furniture.

To maintain your furniture longtime in a clean good condition, we suggest you to regularly clean it with soap water and a soft cloth.

Please **never** polish the surface with a hard polishing pad. Don't use hard materials such as brushes.

Do **not** remove the Textilene and Leisuretex fabric on the arms or seat-back units – if existing. Once it is removed it will be difficult to reassemble it again.

Even solpuri furniture is made for outdoor use, we suggest you to protect material in harsh weather conditions and in winter time by storage indoor or under a roof. By that measure you protect the materials and the product lasts longer.

With above recommendations you will have many years enjoyable moments with your solpuri furniture.
