

## Care instructions for HPL-3D Table Tops

Due to its hard-wearing, hygienic and dense laminated surface, this HPL-3D tabletop does not require any special care or cleaning agents. Only furniture polishes and wax-like cleaning substances must not be used as they can form a sticky, dirt-binding layer. The cleaning products used must also not contain any abrasive or corrosive substances. This can lead to changes in gloss level, scratches or damage to the surface.

For light as well as persistent dirt caused by various substances, regular cleaning is important. Please use only gentle agents such as soap suds. Dirt or spilled liquids such as tea, coffee or wine should always be removed immediately. Prolonged exposure will increase and complicate the cleaning process.

In the course of time, the surface as well as the edge of the table can lose their brilliance and, in some cases, also turn somewhat grey or slightly discoloured. To avoid this, the surface of the tabletop as well as the edges can be treated or refreshed with an **HPL care product**.

Please proceed as follows:

First of all, the tabletop and the edge should be cleaned thoroughly with a household all-purpose cleaner or a lukewarm soapy solution and a soft cloth.

Once the tabletop is dry, the **HPL care product** should be rubbed in thinly. To do so, please apply some of the gel-like care product to a dry polishing cloth and rub the surface evenly. Then let the product act for about 5 minutes. Now remove the excess care product with a soft cloth to avoid it being transferred to other items, e.g. clothes. The use of disposable gloves is recommended. This refreshing operation can be repeated as often as desired.

The bleaching and/or discolouration of the surface or edge does not constitute a technical defect of the tabletop. The refreshing process is therefore not absolutely necessary, but it does improve the appearance of your table.

Please contact your specialist dealer or solpuri direct regarding this **HPL care product**.

By following the instructions described above, you will have many years of pleasure with your solpuri furniture.
